

STATEMENT

My name is Doan Duc Tin. I am a strong creative person, I am most confident in algorithms, thinking, and solving problems. Besides, I could research and rapidly adopt new knowledge quickly to implement it in real situations. Finally, I am a hard-working person and I also can work under high pressure. On another backside, sometimes I could not control my temper well. But in case, I believe I can handle it well to help the project be better.
